HAKKIMDA

After graduating from university in 2020, I seized various training opportunities to enhance the knowledge I gained from an e-commerce internship. Subsequently, I established my own company and engaged in e-commerce activities for about a year. Recognizing my aptitude for learning in the field of technology, I began further developing myself by taking Python and Java programming courses on the Patika platform. Currently, I am continuing to enhance my software development skills through the Front End Web Developer Bootcamp offered by Patika and the CS50X program provided by Edx.

İŞ DENEYİMİ

FRONT-END WEB DEVELOPER BOOTCAMP
Patika.dev -Mart 2023- Continues
